

WCR Group Vision Statement and Partnership Agreement

We seek to operate in a way which benefits all those stakeholders who are impacted by our work. We wish to work with suppliers who can support us in the realisation of such aims. We would therefore ask you to read our statement below and determine whether this is meaningful to you and whether you are prepared to work in a way which honours its spirit.

Our Commitment to a better future

- We are in business to grow as individuals through being consciously aware of our actions and how they affect ourselves and our stake holders; the environment, our clients, our staff, suppliers or local communities, local and national government. We set out to have only a positive impact on ourselves and our stake holders and in so doing to be financially successful. We are serious about what we do, but we also recognise that enjoying our work infuses our actions with creativity and makes life worth living.
- We are aware that the world faces a great challenge in dealing with climate change. We use our significant and growing knowledge of advanced building practice and specifications to create/refurbish small to medium sized commercial buildings that have excellent energy efficiency performance and out-perform all UK environmental/efficiency regulations.
- We are aware that the physical working environment internally and externally can have a strong impact on the health and welfare of its inhabitants. We intend to apply creative solutions to offer healthy, harmonious and aesthetically pleasing working space.
- We intend to be continuously innovative allowing us to deliver ‘cutting edge’ working environments in a cost effective way.
- We intend to anticipate the changes that will be needed to cope with a rapidly changing world and incorporate them to enhance future proofing.
- We intend to deliver to our client’s buildings on time and on budget.
- We intend to educate our clients in the efficient utilisation of their new buildings systems technology.
- We provide user friendly systems that allow our clients to make the best use of the technology available to them.

As an authorised representative of I confirm that I have read and understood the above and confirm that my organisation will seek, through any services we provide any WCR Group company, to hold an awareness of this Vision and to foster an allegiance to its spirit.
